

About Us

Established in 2024, HealthX was founded to empower multidisciplinary collaboration in student-led healthcare projects, and bring together students from different disciplines to learn about medical innovation and co-create impactful healthcare solutions.

We are rooted in student-led collaboration and have grown into a dynamic space where students from diverse disciplines unite around a shared purpose.

Our events consistently emphasise peer learning, collaboration, and shared goals—fostering lasting relationships among students, clinicians, and industry experts. Many of these connections and projects extend well beyond our events.

Our Impact

Since our inception, **HealthX** has rapidly grown into one of NUS' leading platforms for interdisciplinary medical innovation.
