

## What is Health X'posure?

A **MedTech exposure programme** to kickstart innovation through building networks and knowledge, creating value for participants by exposing them to real world innovation through talks and events.

Our goal is to **cultivate** interest in Med Tech and **encourage** organic interactions between innovators

## Events

### AI in Healthcare Masterclass

(16th January 2026)

### MedTech Business Masterclass

(27th October 2025)

### Brain-Computer Interfacing Workshop

(15th September 2025)

[Read More](#)

The event featured insightful sharings by **A/Prof Liang Zhong** (Senior Clinician-Innovator at Duke-NUS Medical School and Director of the Cardiovascular System Imaging & AI Lab) and **Dr Dinesh V. Gunasekaran** (Healthcare Technology Leader, Clinician Scientist at the MOH Office of Healthcare Innovation and Commonwealth Innovation Fellow), who discussed how artificial intelligence is transforming clinical workflows, diagnostics and decision-making in real-world healthcare settings.

Participants gained practical perspectives on translating AI and MedTech innovations into deployable clinical solutions, including ongoing trials in local hospitals, while engaging in candid conversations on the opportunities, challenges and ethical considerations surrounding AI adoption. The session also provided a platform for clinicians, technologists and students to connect and exchange ideas at the intersection of medicine, technology and entrepreneurship.

### NUS KCL Medical Innovation Challenge

(26th February 2025)

[Read More](#)

The event featured an engaging sharing by **Dr. Ian Mathews** (Emergency Physician, Deputy Group CTO of NUHS, and Stanford Biodesign Global Fellow), **Dr. Monika Mehta** (Co-founder & CEO, Zealth-AI; Antler & Y Combinator-backed founder), and **Ms. Dorothea K.** (Co-founder & CEO, Bot MD; former Baxter Healthcare & Medtronic executive), who discussed how MedTech innovations are brought from concept to market.

It also offered a platform for students and innovators to connect, exchange ideas, and gain insights into design thinking, commercialization, and the startup journey in healthcare innovation.

### Innovation Sharing 2: Regenerative Medicine

(7th February 2025)

Team HealthX kicked off AY25/26 with an inspiring workshop on the future of Brain-Computer Interfaces (BCI), in collaboration with g.tec medical engineering. The event brought the NUS community together to explore how neuroscience and technology converge to revolutionise healthcare and human-computer interaction.

Participants enjoyed an engaging keynote by **Ms. Christy Li**, hands-on demos with cutting-edge neural devices, and networking with MedTech experts and peers. The workshop showcased the transformative potential of BCIs in healthcare, rehabilitation and research, empowering future innovators to push the boundaries of neurotechnology.

### Mingle and Jingle MedTech Networking Event

(25th January 2025)
